HANDSAW SYSTEM

**Bahco –
continuous
innovation
since 1886**

Together we continue to shape the future of handsaws!

We listen to the people who use our tools. This philosophy has guided us in everything we have done since we made our first wood saw back in 1886. And it continues to guide us today.

Professional craftsmen demand safety and ease of use; the Bahco brand is a guarantee of the highest quality and performance. Our range of handsaws covers all modern needs and applications, and our products are a source of true inspiration to craftsmen the world over.

Bahco ERGO™
– a revolution
since 1982

Consumers need ergonomic tools, and their interest in them continues to grow. And Bahco remains way ahead of the competition!

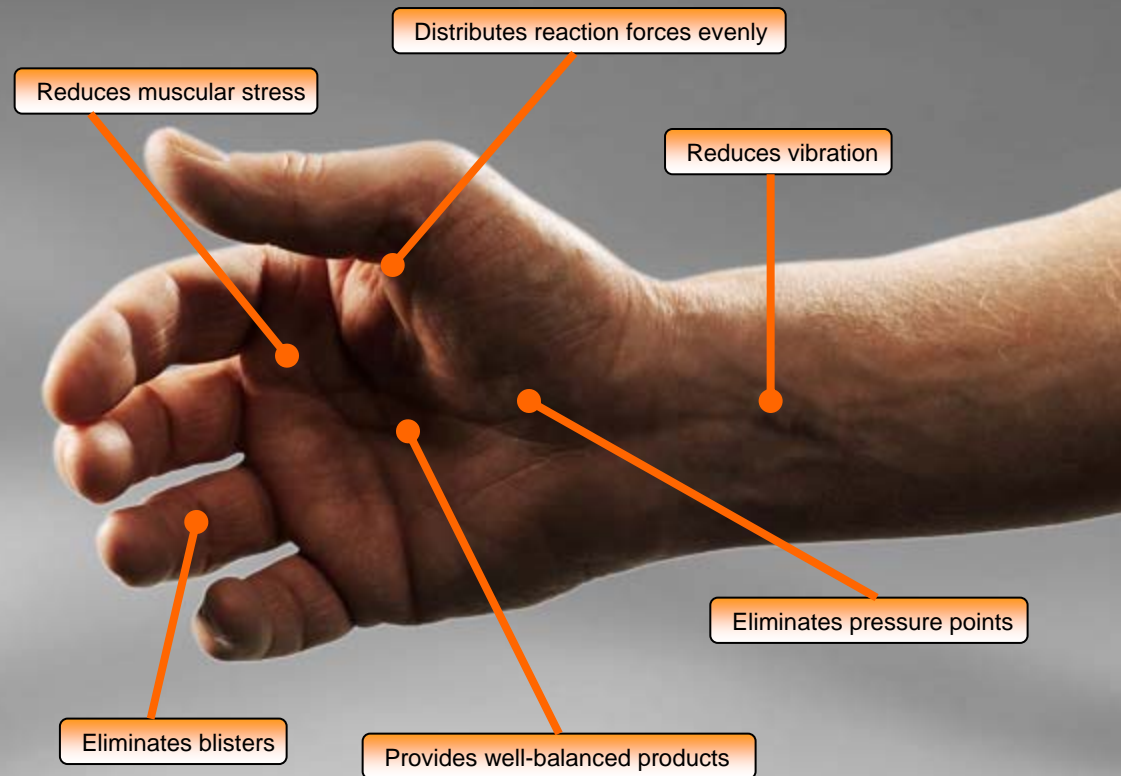

Bahco ERGO™
– a revolution
since 1982

- World leader in ergonomic hand tools
- Developer of more than 400 ERGO™ tools
- A unique product development process

Our ERGO™ product development process involves close cooperation between R&D, professional ergonomists, industrial designers and users of hand tools. This teamwork ensures our products provide the very best user comfort available today.

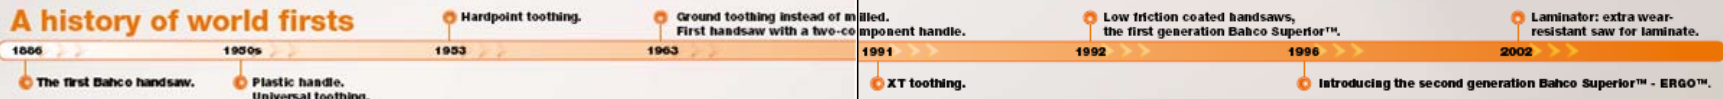

Gripping a tool activates 42 different muscles in the hand – this is where ERGO™ comes in!

More than 120 years
... of hand tools development
... of ingenious designs
... of listening to end-users

A history of world firsts

Makes of Bahco a pioneer!

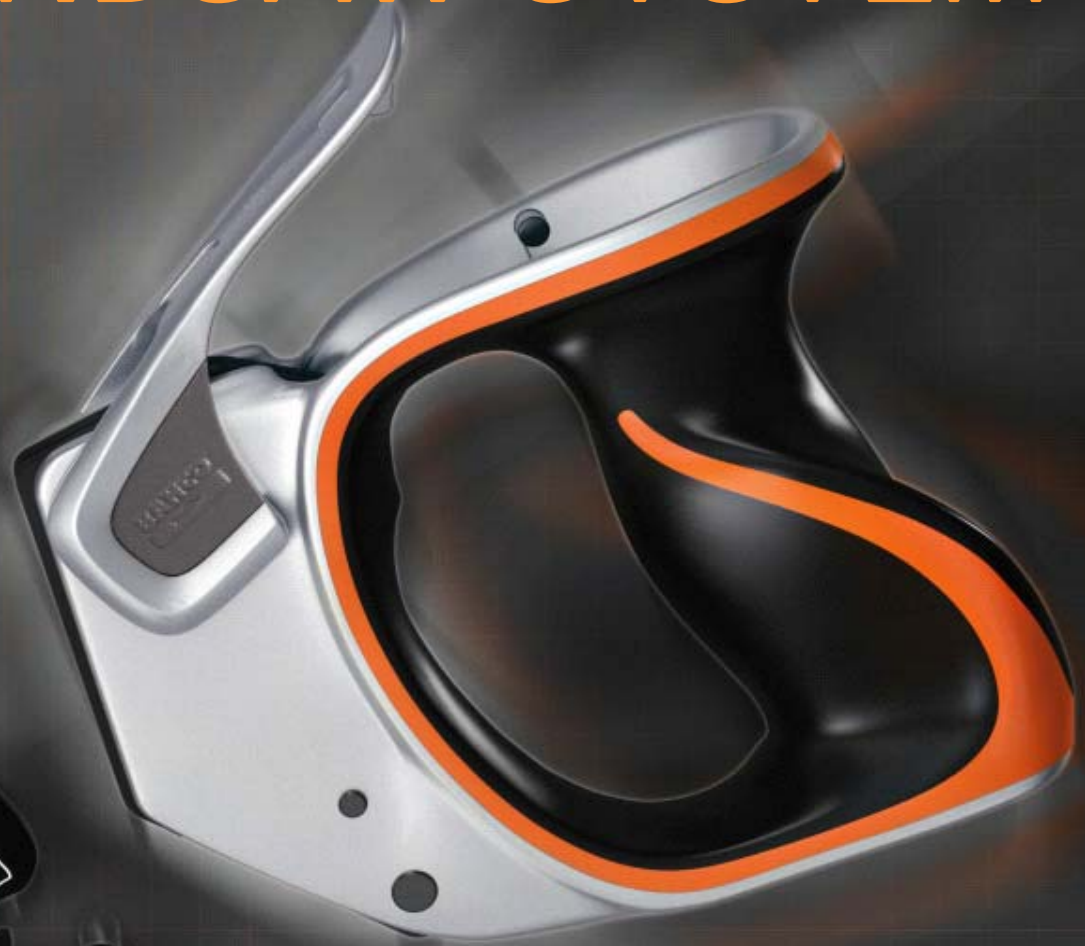

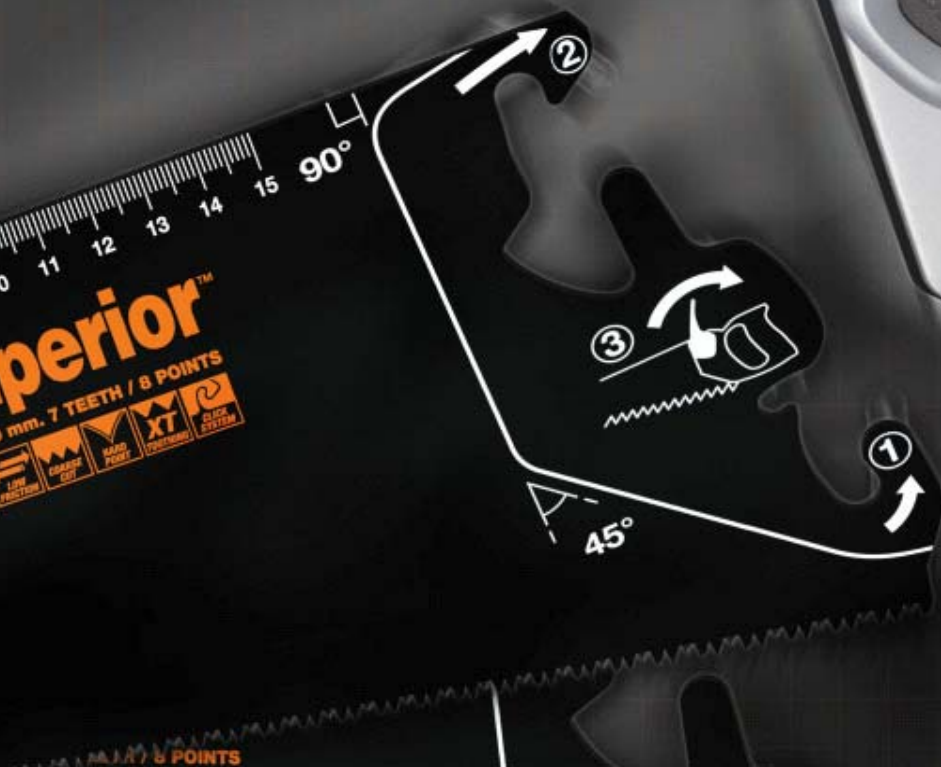

- **1886** the first handsaw is produced in Sandviken
- In the **1950's** the worlds first saw with a plastic handle is launched
- **1953** hard point toothing is developed and introduced
- **1963** ground toothing equipment is installed in the factory and the first two component plastic handle enters the market
- **1992** the first generation of the Superior saw was developed through the ErgoTM concept and the name is still synonymous with the best saw in the world
- **1996** the Superior saw is updated and developed through the ErgoTM concept and a new handle is introduced
- **2004** Bahco launched the New Generation handsaws, and became the true category leader of handsaws
- **2008 Bahco introduces the HANDSAW SYSTEM....**
Sawing will never be the same again!

In professional hands
since 1886.

HANDSAW SYSTEM

*Sawing will never
be the same again.*

The Bahco
Handsaw
System

HANDSAW SYSTEM

A new, revolutionary and professional approach to sawing! The most comfortable Bahco ERGO™ handle ever and a wide range of interchangeable Bahco Superior™ saw blades create a truly flexible system never seen before!

The Best ERGO™
handsaw handle
ever!

HANDSAW SYSTEM

- Asymmetric handle design means no pressure points and stops the hand sliding on the handle
- Thermoplastic Elastomer (TPE) for optimum friction and a warm feel
- Angles and position of the handle in relation to the blade teeth reduces sawing forces and increases efficiency
- Available in two versions - for right or left-handed users
- Adapted to fit hand size, this handle is available in two different sizes*, medium and large

* Left-handed handle is available in one size only.

ergo®

Comfort and
stability

HANDSAW SYSTEM

- High quality aluminium body ensures rigidity as well as retaining and protecting the locking mechanism
- Soft shapes and material - ensure comfortable use
- High quality blade locking system - ensures no play between handle and blade when assembled
- Extended index finger support – increases precision when sawing

ergo®

Patented
locking
system

HANDSAW SYSTEM

- Easy access to lever through opening in handle end
- Long lever for easy locking and release of the saw blade
- Security spring locks the lever

ergo®

The best saw
blades in the
world!

HANDSAW SYSTEM

High performance Bahco **Superior™** blades

- Thicker blade for stability and precision
- Low friction coating for easier sawing
- Hard point teeth for long lasting cutting efficiency
- Unique patented XT toothing – the ultimate choice for efficiency and comfortable sawing really save end users energy!

Superior™

Interchangeable
blade
system

HANDSAW SYSTEM

A blade for every common application

For timber, wet wood and tanalised.

Dry wood, medium cutting.

Fine cutting in hard wood.

Laminate and wooden floors.

Plaster and particle boards.

General purpose.

- Interchangeable blade system
- Simple storage, easy handling and straightforward replacement of worn blades

Superior™

Easy handling

HANSAW SYSTEM

Hold the handle horizontally and pull the lever.

First, connect the base of the blade to the base of the handle, then the rest of the blade

Push back the lever until you hear the click. Secure the lever with the security spring. The blade is now safely in position

**Professional
enthusiasm!**

HANSAW SYSTEM

“More support and stability, ideal when you’re sawing in a straight line.”

“More support thanks to the wing on the handle.”

“Close to the shape of the hand. Great!”

“It’s the best grip I’ve ever tried. I’m in perfect control of the tool.”

“The slightly heavy feel adds to the stability and comfort.”

“It’s comfortable to use for relatively long periods.”
