

Take it along. Set it up. Cut cleanly.
HKC 55 cordless portable circular saw
with FSK cross cutting guide rail

HKC 55

FESTOOL
Tools for the toughest demands

More independence. More precision.

The HKC 55 with FSK cross cutting guide rail.

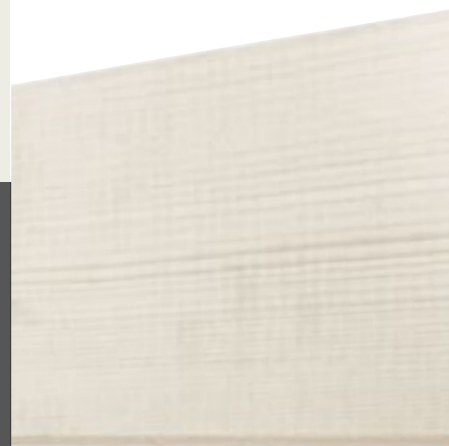

For more mobility when working with timber: the HKC 55 cordless portable circular saw with FSK cross cutting guide rail demonstrates what a modern saw can achieve on the roof. It produces fast, precise and clean cuts, even though there are no cables.

The 5.2 Ah high-performance battery pack and the efficient EC-TEC brushless motor with a speed of 4,500 rpm ensures clean fast cuts while the rail with the stop system provides maximum precision and exact angles. Previously this was generally only possible with fixed saws. The balanced weight distribution, simple operation of the hinged cover and intelligent angle and depth adjustment also help you to work efficiently.

For greater independence and precision; the HKC 55 cordless portable circular saw with FSK cross cutting guide rail.

One click and you're done. Coupling the HKC 55 with the FSK cross cutting guide rail, which is available in three lengths, is incredibly easy. In no time at all, you have a mobile, easy-to-handle mitre-saw system for precise and accurate angled cuts.

Concentrated power. The combination of an 18V lithium-ion battery pack and brushless EC-TEC motor with integrated motor management ensures impressive cutting performance. Free from the restraints of plug sockets and cables.

The same job.
Done more precisely and more quickly.

No matter how high you set your sights and no matter how diverse the requirements are – the HKC 55 cordless portable circular saw with FSK cross cutting guide rail makes it possible to produce clean cuts with repeat accuracy virtually anywhere. For example, it makes cutting roof battens to size even more precise with the convenient stop system. And the powerful 18V battery pack and the high-torque brushless EC-TEC motor provide the required speed whilst the sophisticated ergonomics and low weight also help make your job easier.

Convenient and safe with the hinged cover. For easy sawing and a clear view of the saw blade, just press the lever on the front handle. And just like that, the hinged cover releases the saw blade.

Scribe mark = cut. Precision work, even with mitre cutting angles of up to 50°. When working with the HKC 55 in combination with the guide or cross cutting guide rail, the cutting edge will always follow the scribe mark edge exactly, even when mitre cutting.

Sophisticated stop system: The cross cutting guide rail has a stop system which allows angle cuts from 0° to 60° to be made with repeat accuracy – in both directions. Ideally suited for serial cutting, e.g. facade formwork.

Precision guidance: The HKC 55 demonstrates its versatility when combined with the Festool guide rail system, too. So, for example, insulation boards can be cut to size quickly and accurately using the FS 1400/2.

SERVICE all-inclusive

Even more security: HKC 55 with SERVICE all-inclusive. To secure 36 months of theft protection and other benefits, simply register your new HKC 55 within 30 days of purchase online at www.festool.co.uk/service.

Not just a saw. But a mitre-saw system.

The HKC 55 cordless portable circular saw with FSK cross cutting guide rail. The mitre-saw system for more independence combines precision and efficiency with a high level of user-friendliness, optimised ergonomics and ease of use. Features such as the cutting depth adjustment with plunge cut function, the hinged-cover, riving knife and FastFix saw blade change, provide the best possible working conditions. And the cross cutting guide rail provides precise cutting with repeat accuracy.

FSK

The quick-acting closure: The HKC 55 can be coupled to the cross cutting guide rail or decoupled from it in an instant. Depending on whether you want to saw with a guide or freehand.

The stop system: The fixed positioning bolt and the adjustable stop allow angle cuts from -60° to $+60^{\circ}$ to be made and which can be repeated exactly. For simple work, lock the most common angle settings into place in the rail.

The retraction function: To ensure it is always ready for use, the cross cutting guide rail has an adjustable stop and an integrated rubber spring, which automatically brings the HKC 55 back to the starting position.

HKC 55

Extremely easy depth adjustment: Simply push the lever and set the desired cutting depth using the clearly visible and easy-to-read scale, then release – and you're done. Combine this with the plunge cut function and you will find you can make plunge cuts to the preset cutting depth easily and conveniently.

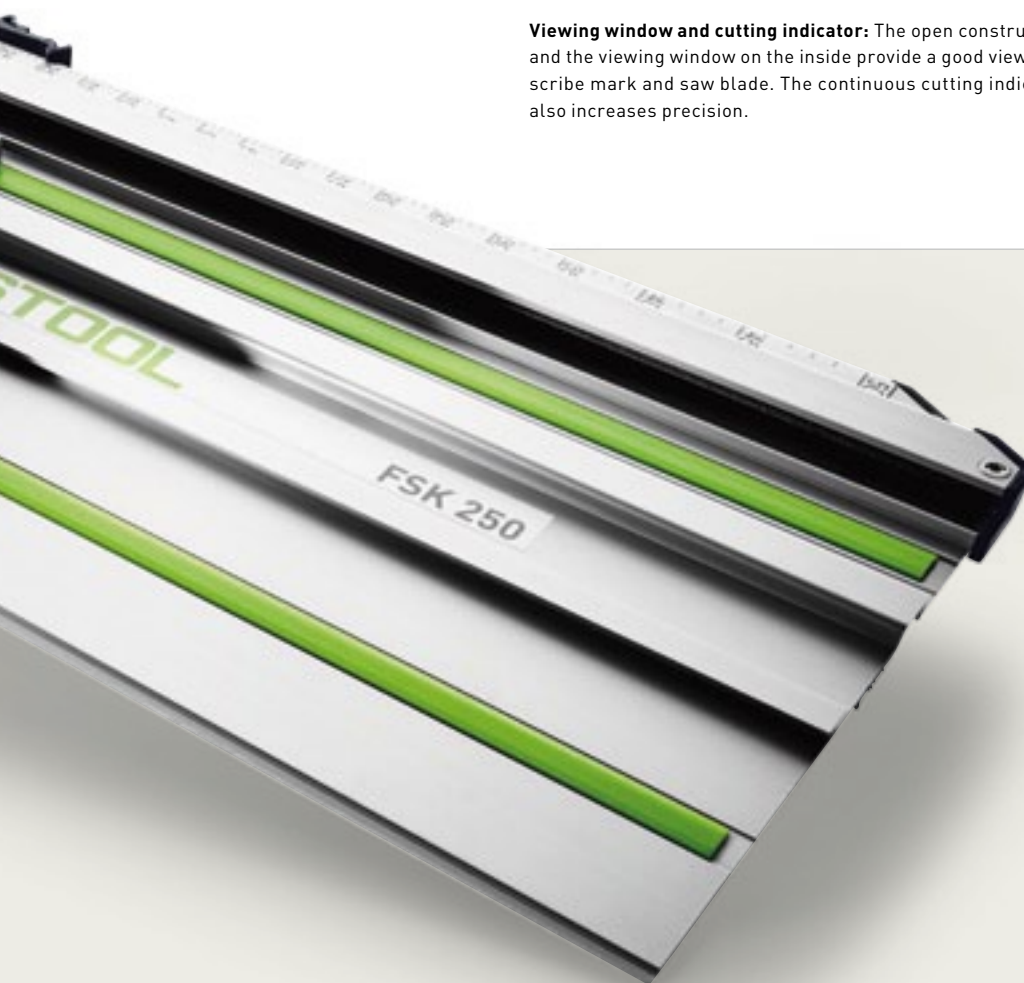

Hinged-cover: To enable a clear view of the saw blade, the hinged protective cover can be moved backwards from the handle, thus uncovering the saw blade. Ensuring your hands always remain at a safe distance from the saw blade.

Riving knife for a high level of safety: The riving knife enables unobstructed, stress-free and therefore safe sawing. Because it is integrated into the spring-mounted hinged cover, it is also possible to carry out plunge cuts in a safe and unobstructed way.

Viewing window and cutting indicator: The open construction and the viewing window on the inside provide a good view of the scribe mark and saw blade. The continuous cutting indicator also increases precision.

The FastFix saw blade change: Quick, one-handed and with no need for tools. Saves time and improves quality, because working with a material-specific saw blade goes without saying.

The HKC 55: in good company.
**Welcome to the Festool system
for working with timber.**

For even more independence. The Festool 18-Volt-system.

Sawing, drilling and working with screws. With endurance, with precision and with absolute ease. The 18-Volt-system frees you from the constraints of electrical sockets and guarantees the best results every time. With the combination of a 5.2Ah high-performance battery packs and the brushless EC-TEC motor.

For tools that set the pace when it comes to performance, speed and energy. That complement each other perfectly in terms of dynamics, convenience and efficiency, creating a better rhythm for your work. Providing you with everything you need to give you new inspiration every day with SERVICE all-inclusive.

The Festool 18-Volt-system. For even more independence when working with timber.

>>> For more information, go to www.festool.co.uk/unplugged.

**QUADRIVE. Powerful results while working with screws.
Precise drilling.**

18V for more independence while working with timber together with performance you would expect from any timber specialist: for inserting screws up to 8 x 300 mm and for drilling up to 3,800 rpm. And of course, with a FastFix interface and angle attachment.

HKC 55. More independence, more precision.

With an 18V battery pack, EC-TEC motor and cutting rail, the HKC 55 cordless portable circular saw provides accurate and reproducible angle cuts. Practically anywhere and practically in any situation.

POWERSELECT

Simply select. Simply combine. Simply brilliant.

With PowerSelect, all options are open to you. Starter sets for a perfect way to get started, basic variants as a logical extension to the system. With accessory battery packs and chargers available to buy later. In short, you only buy what you really need.

>>> For more information, go to
www.festool.co.uk/powerselect.

BASIC

HKC 55 basic device in a SYSTAINER

Purchase a basic device and use existing battery packs. The perfect addition to your Festool system.

ENERGY

5.2 Ah battery pack and charger available separately

Buy later without the 'buy-later' trap. Even the accessory battery packs and chargers are calculated fairly, without any hidden extra costs.

SERVICE all-inclusive. Now also for accessory battery packs and chargers.

FULL SET

HKC 55 basic device in a SYSTAINER

- + 2 x 5.2 Ah battery packs
- + charger
- + FSK 420 cross cutting guide rail

Open, remove, get started. The full set. Perfect for working with the Festool system.
